Web-Based Case Management and Intelligence Software

HIDTA

- Case Management
- Criminal Intelligence
- Case Deconfliction
- Tips Management

Technical Requirements:

- Internet PC
- Attend a Training Class

Case Management

Manages case information about people, places, things, vehicles, weapons and drugs.

- Each case can have an unlimited number of file attachments such as documents, pictures, audio and video files.
- Web interface eases the management of case data.
- Optional interface into HIDTA Performance Management Program (PMP).

Criminal Intelligence

Easily collect, analyze and disseminate intelligence within and among organizations.

- 28CFR Part 23 compliant.

Tips Management

- Confidentially stores but does not share unconfirmed data.

Case Deconfliction

Match data between organizations allowing interagency deconfliction while maintaining control of local data.

- Email notifications are sent for case matches.

CASE EXPLORER software is free to all law enforcement and public safety organizations. Support services are also available.
www.hidta.org/ce

Event Deconfliction

Plot events geospatially with notification of any conflicting events within your defined radius.

- Email notifications are sent for event conflicts.
- Spatial awareness feature allows addresses associated with any case or event to be mapped.
